

SYLFIRM<sup>X</sup>

ULTIMATE EDITION

SYLFIRM<sup>X</sup>

WORLD FIRST DUAL WAVE RF  
MICRONEEDLING SYSTEM

# Dual-Wave Radio Frequency Micro Needling

Unlike conventional RF microneedling systems, Sylfirm X has both a Continuous Wave and Pulsed Wave, capable of treating pigmented and vascular lesions such as melasma and diffused redness, as well as skin rejuvenation and scarring.

In addition, the device can treat in dual wave from 0.3mm to 4mm with 24K gold needles. This allows customisation to individual patients to provide a delicate and precise treatment.

## How Does it Work?

Sylfirm X uses innovative SR3 Technology (RP), the latest SMART generation tech that selectively treats the skin using Regional Regeneration Radio Repeated Pulse.

It uses multiple tiny electrodes to generate a powerful electromagnetic field of energy that safely and effectively penetrates the dermal layer.

SMART technology selectively treats abnormal skin vessels such as Melasma, Rosacea, Hyper-pigmentation while strengthening the skin's base membrane. The results are improved skin tone, clearer and more radiant looking skin.

# The Sylfirm X Procedure

## CONSULTATION

Your practitioner will advise on suitability and your treatment outcome objectives.

## DURING TREATMENT

The Sylfirm X handpiece will be lightly applied and the treatment will begin. The treatment area will feel a warming sensation.

## AFTER TREATMENT

The skin may appear red or experience minor swelling in the treated area but this usually subsides within 24 hours. Avoid exercise, swimming and sauna for 24 hours following Sylfirm X.

## RESULTS

Visible tightening results come immediately and the results of dermal remodelling appear over time. For most clients, measurable results appear gradually in 2-3 months.

SYLFIRM X

ULTIMATE EDITION

## Indications

SYLFIRM X

# FAQ's

## How many treatments do I need?

Results can be seen from a single treatment of Sylfirm X. For better results, a course of 3 or more may be suggested, depending on each individual's needs.

## Is it suitable for all skin types?

Sylfirm X uses pulsed wave technology to provide enough thermal relaxation time, making it safe and effective for all skin types.

## What are the contraindications?

Pregnancy, neoplastic disease, pacemakers, lesions of the skin and anti-coagulation drugs.

**We recommend 3 or more treatments for best results.**
